Keylor Palacios Gómez

Full Stack Developer | Next.js, React, TypeScript and Cloud

Costa Rica | +(506) 8368-7759 | palaciosk8321@gmail.com | linkedin.com/in/kpg

PROFESSIONAL SUMMARY

Bachelor's degree in Business Informatics with experience in full stack development with Next.js, React and TypeScript, and in backend services with REST APIs, authentication and relational databases. I have worked with Git and GitHub Actions, deployed applications to the cloud and resolved technical incidents in real applications. Proactive, able to move forward with high-level guidance and to explain technical work to technical and non-technical audiences. With great curiosity about AI agents, large language models (LLMs) and their responsible use, and eager to learn and grow alongside senior engineers.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Vue.js, React Native, responsive design, UI/UX fundamentals

Backend and APIs: REST API (JSON) development and integration, backend/frontend separation, Node.js, Express.js, .NET, ASP.NET Core, business logic

Cloud, CI/CD and version control: Git, GitHub, GitHub Actions, Vercel, Google Cloud Platform, Azure, Firebase

Databases: PostgreSQL, Supabase, SQL Server, MySQL, MongoDB, Firestore (documents)

Security: Authentication and authorization, role-based access control, Row Level Security (RLS) policies

Languages: TypeScript, JavaScript, C#, Java, PHP, SQL

Practices: Scrum, Clean Code, performance optimization, incident resolution, technical documentation

PROFESSIONAL EXPERIENCE

Extremo Sur — Tourism web platform Mar. 2025 – Jul. 2025

Full Stack Developer (project) | *Next.js, React, TypeScript, Supabase, PostgreSQL*

- Developed a booking platform end to end with Next.js, React and TypeScript, with a backend on Supabase and PostgreSQL.
- Built an administrative dashboard with user and booking management, metrics, filters and CSV report export.
- Implemented authentication, authorization and Row Level Security (RLS) policies to protect data and limit operations according to roles.
- Integrated internationalization (i18n) in Spanish and English and managed files with Supabase Storage.

Arenal Factura — Supervised Business Internship Aug. 2025 – Dec. 2025

Backend Developer | *SQL Server, C#/.NET, Entity Framework*

- Developed backend features with business logic and data validations, applying OOP and best practices in well-organized code.
- Collaborated in identifying and resolving technical incidents to contribute to the stability of the application in production.
- Implemented automated email-sending services and designed data structures in SQL Server.
- Worked with high-level guidance, managing several tasks in parallel and adapting to changing priorities.

University of Costa Rica — Office of Informatics Aug. 2024 – Dec. 2025

Technical Assistant in Support and Maintenance | *Golfito, Puntarenas*

- Managed and resolved technical incidents for students and staff, explaining solutions clearly to non-technical users.
- Performed maintenance on computer and network equipment, and configured equipment for institutional activities.

EDUCATION

University of Costa Rica — Bachelor's Degree in Business Informatics Apr. 2021 – Dec. 2025

LANGUAGES

Spanish: Native | English: Intermediate (B1)
